6. Click on Details and you can view the Pretrip report

SETTINGS

This option can be used for:

1. Change brightness
2. Upload database (external use only)
3. Rewrite Database (external use only)

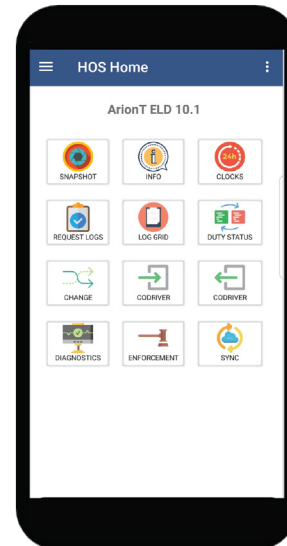

HOS HOME

Once the driver logs in with his credentials, he will get the main HOS screen. HOS options are available on main home page and in right side drop down menu too.

The main page consists of following options:

Snapshot
Info
Clocks
Request Logs
Log Grid
Duty Status
Change Driver
Co-Driver Login
Co-Driver Logout
Diagnostics
Enforcement
Reset
Sync

SNAPSHOT

This option gives the overview for the total remaining and completed hours according to his duty status. The negative sign in front of number shows the remaining time

CLOCKS

The drivers can see the available and over hours in the form of colored bars. It will give the current duty status along with Hours remaining or over in other status like On duty , Driving and shift.

CO-DRIVER

The co-driver has to login on the same device and once the co-driver login the system than his duty status will be off duty and he can change his status to Active driver. When the co-driver is active driver than he can change his duty status to his status at that time.

INFO

The info tab provide the basic information to make the logs. It contains the Company, Drivers and vehicles basic information

REQUEST LOGS

It is an option for driver to send the logs via email or Fax. To do this driver just need to put the email address or Fax number. The logs will be sent within 5 minutes of request.

CO-DRIVER LOGOUT

After his shift co-driver can simply change his status to inactive driver and can logout

CHANGE DRIVER

In case of team driver; both drivers can change there status active drivers Team drivers can change there status back and forth

DUTY STATUS

By simply clicking on the options driver can change his duty status whether its ON duty, off duty, sleep, drive. When you changed the duty status it will automatically change the status on Grid as well. Driver can select duty status according to its shift.

When he selects option 7 than a “change status” box will appear and driver has to fill the required information of additional comment, document id and trailer id and than driver can save it and this will change the driver’s grid by itself.

LOG GRID

The grid has four parts Off duty, Sleep, Driving, On duty. The grid provides the running logs and the current duty status of thee driver. The detail information of duty status can be seen by double clicking the status area. The grids for last 14 days can be scrolled by clicking the “green arrow” on top.

2. Click on Request Logs
3. To send the Logs and Pretrip to Enforcement officer, enter the email address or fax number and click request logs

MALFUNCTIONING GUIDE

FMCSA Guidelines set forth in §395.22

Motor carrier responsibilities – In general. (h) A motor carrier must ensure that its drivers possess onboard a commercial motor vehicle on ELD information packet containing the following items: (3) An instruction sheet for the driver describing ELD malfunction reporting requirements and recordkeeping procedures during ELD malfunctions.

Malfunctioning Guildelines

Top bar on the device is Red: Red color means the ECM has not been connected to the Display device. To verify the status, click on the Yellow Triangle the display will say ECM not connected.

Solution: The Driver can check if the Black box is connected properly to the ECM port. The driver or company can call our 24/7 support line 1905-451-6588 or they can email at support@ariontech.ca. Our staff will help the user for the connectivity.

Red Bar Remains Red: if the connection is not maintained by trouble shooting a new device has to be installed.

Malfunction time duration: If a motor carrier needs a time extension, they must notify the FMCSA Division Administrator for the state of motor carrier's principal place of business within 5 days after a driver notifies the motor carrier according to the guidelines set forth in §395.34(2)

If an ELD Malfunctions, a Driver must:

1. Note the malfunction of the ELD and provide written notice of the malfunction to the motor carrier within 24 hours;
2. Reconstruct the record of duty status (RODS) for the current 24-hour period and the previous 7 consecutive days, and record the records of duty status on graph-grid paper logs that comply with 49 CFR 395.8, unless the driver already has the records or retrieves them from the ELD; and
3. Continue to manually prepare RODS in accordance with 49 CFR 395.8 until the ELD is serviced and back in compliance. The recording of the driver's hours of service on a paper log cannot continue for more than 8 days after the malfunction; a driver that continues to record his or her hours of service on a paper.
